SUMMARY

Software Developer with 2+ years of experience building scalable SaaS applications, internal tools, and client-facing platforms using React, TypeScript, and Tailwind CSS. Experienced in developing dashboards, ATS systems, and API-driven interfaces, with a growing interest in Generative AI, including hands-on experience building RAG-based applications.

TECHNICAL SKILLS

React.js | TypeScript | Tailwind CSS | Redux Toolkit | TanStack Query | Ant Design | Express.js | REST APIs | SQL Server | Azure Blob Storage| JavaScript (ES6+) |Python | LangChain | Chroma DB | FastAPI.

EXPERIENCE

Software Developer – ST Global Tech | Dec 2023 – Present

- Built and maintain a full-stack **Applicant Tracking System** (React, TypeScript, Express, SQL Server) managing 4000+ candidate profiles and 30+ clients, used daily by 10+ internal recruiters.
- Implemented **Role-Based Access Control** (RBAC) with continent-level data filters to enforce client-specific compliance and data visibility restrictions.
- Built a bulk resume upload feature supporting up to 500 resumes at a time, integrated with Azure Blob Storage for secure file management.
- Architected a talent pool module enabling recruiters to search, filter, and manage candidates efficiently across multiple client accounts.
- Implemented a reporting module and an invoicing system to consolidate the full recruitment workflow in one tool.
- Automated candidate billing workflows by building a full-stack invoicing system (React, TypeScript, Express, SQL Server), replacing manual Excel/Word processes and reducing invoice generation time by an estimated 70% across monthly billing cycles.
- Rebuilt the company website from scratch (React, TypeScript, Tailwind, Express, SQL Server), migrating from a static Bootstrap site to a modern full-stack application.
- Improved Core Web Vitals scores by implementing lazy loading and asset optimization on the company website rebuild, reducing initial page load time and improving Google Search performance.
- Developed the frontend for a Learning Management System (React, TypeScript, Tailwind) serving 30+ active learners.
- Integrated third-party RESTful APIs into a Next.js travel booking platform, resolving data synchronization failures and improving booking data reliability for end users.

Freelance – Jan 2023 - Dec 2023

- Built and shipped a production-ready marketing website (React, TypeScript, Tailwind, Express), translating Figma designs to pixel-perfect implementation and managing end-to-end client communication across 3+ feedback cycles. [**Mavelead.com**]

- Developed role-based access control and redesigned core UI components for Realigno.com (React, TypeScript, Ant Design), improving platform usability for non-technical users and contributing to increased user adoption on the SaaS platform. [**Realigno.com** , **dev.realigno.com**]

PORJECTS

DocuMind — **documind-delta.vercel.app** | **github.com/ Hemant837/documind**

- Built a production-ready full-stack RAG application enabling users to upload PDFs and query them via an AI chat interface with inline source citations, using LangChain, Chroma Cloud, and FastAPI.

- Architected and optimized an end-to-end **RAG pipeline** (PDF parsing, semantic chunking, embeddings, vector retrieval) with real-time token streaming via SSE and multi-tenant data isolation.

- Engineered a scalable async full-stack system using FastAPI, Neon DB, and React, implementing secure JWT-based authentication and Google OAuth, and deployed on Railway and Vercel.

EDUCATION

B. Tech in Information Technology (77%) **2018-2022**

College of Engineering Roorkee, Roorkee, Uttarakhand

ACHIEVEMENTS

- Delivered a LMS project 2 weeks ahead of schedule, recognized for collaboration, technical ownership, and problem-solving.
- Runner-up in Zonal round of IITB Techfest (2019-20).
- 2nd runner-up in College Hackathon and 1st Runner-up in SIH Internal Hackathon.
